

Mainline Patterns

Created by laminating 92-gauge polyester (MET/PET) film to Metsä Board's C1S folding boxboard (FBB), Mainline Holographics' Pattern board is available in over 60 different designs. The board is sturdy enough to be folded, diecut, or embossed, and provides an excellent surface for printing. Graded for cosmetic use, this board is ideal for use in packaging, point of purchase displays, signage, CD and record covers, book jackets, tags, or posters.

Available from 80# to 40pt and 28" x 40" sheets; custom sizing also available. Mainline Patterns can also be laminated to other board types, such as SBS, SUS, and CCNB, as needed.

| | |
|--------------------|--------------------|
| Haze Level: | <1.0 |
| Film Basis Weight: | 6.25 |
| Adhesive: | Water-based |
| Top Coat: | Clear, water-based |

NOTE: MET/PET film amplifies a board's imperfections; as such, they are a normal, inherent part of the finished product.
