

Mainline Silver

Created by laminating 1/2 mil polyester (MET/PET) film to Metsä Board's C1S folding boxboard (FBB), Mainline Silver is sturdy enough to be folded, diecut, or embossed, and provides an excellent surface for printing. Graded for cosmetic use, Mainline Silver is ideal for use in beauty or luxury packaging, as well as for point of purchase displays, signage, or even CD and record covers, book jackets, tags, or greeting cards.

Available from 80# to 40pt. Mainline Silver can also be laminated to other board types, such as SBS, SUS, and CCNB, as needed.

Board Calipers:	16pt	18pt	24pt	
Basis Weights:	166#	177#	228#	(includes film and adhesive)
Haze Level:	<1.0 film			
Film Basis Weight:	3.46			
Adhesive:	Water-based			

NOTE: MET/PET film amplifies a board's imperfections; as such, they are a normal, inherent part of the finished product
